

*Okay, I am concerned about peak oil, climate change, and economic instability...what can I do?*

### Join Transition Whatcom

Transition Whatcom (TW) is a community organization whose members believe we must dramatically reduce energy use in response to impending energy resource scarcity and cost, climate change, and economic instability. TW is engaging the community to build resilience- the capacity to provide for our basic needs as we reduce our energy use and dependence on fossil fuels.

### Come to the Great Unleashing on April 10 and 11!

The Great Unleashing will be a two-day celebration and extravaganza that will motivate, excite, educate and engage our community in coming together to envision a vibrant, resilient, and dramatically less energy-dependent Whatcom County, and will unleash our collective genius as we start working towards a tangible and compelling plan to get us there. *Don't miss it!*
